

## Data Support Australia

*Are Scripting and SQL your favourite dialects? Are you an IT sleuth who likes to clear up incidents?  
Welcome to CFM!*

### The day-to-day job:

You will be joining the Data QA & Environment team and helping to improve technical support. That means:

- Dealing with incidents (analysing and resolving anomalies) and qualitative follow-up with all the Data teams
- Proposing improvements to/maintenance of production tools
- Writing all support procedures and putting them in place.
- Specification and realisation of tools to improve the production

### Your profile:

You are an IT specialist who likes production and wants to work on the statistical analysis of terabytes of data. But more than that:

- For you, support means having a **sense of service** and solving **difficult issues**.
- You like challenges, and you're active, reactive and proactive all rolled into one!
- You're a team player: you know how to contribute ideas and listen to other people's.
- Market finance is a field that you know or are interested in.
- You know a **scripting language (ideally Python) and SQL requests**.
- A Bac + 5 qualification as a minimum.
- You speak English fluently, speaking French would be appreciated (but not required)

### The context

Our methodology is based on statistical analysis of terabytes of financial data for asset allocation, trading decisions and the automatic execution of stock exchange orders.

By its nature, the Data team is at the heart of the organisation and provides datasets to the Research teams (who draw up our trading strategies) and the IT teams (who apply these strategies on the financial markets). The quality of the data is of the utmost importance, as are rapid correction response times in order to ensure optimal production.

### The company:

Founded in 1991, Capital Fund Management (CFM) is a successful alternative asset manager and a pioneer in the field of quantitative trading applied to capital markets across the globe. Our methodology relies on statistically robust analysis of terabytes of financial data to inform and enable our asset allocation, trading decisions and automated order execution.

CFM offers a challenging and rewarding career for highly-talented and passionate PhD's, IT engineers and experts from around the world. Our people can draw on 28 years of research and analysis into financial market data as well as investment into our cutting edge technology platforms. These fundamentals allow us to create and execute state-of-the-art trading strategies for our clients and offer exciting career opportunities for our employees.

Our people's diversity and dedication contribute to CFM's unique culture of research, innovation and achievement. We are a Great Place to Work company and we offer a collaborative and informal work environment, attractive offices and facilities and highly competitive compensation packages including a profit-based bonus system.

The company is regulated by AMF, the SEC and the CFTC, with assets under management of \$10 billion.
